MIDSTREAM ENERGY COMPLETES ACQUISITION OF LOUISIANA GAS GATHERING SYSTEM

Tulsa, Ok – Midstream Energy Services, LLC (MIDSTREAM ENERGY), announced today the closing of the acquisition of onshore gas gathering assets located in Southwestern Louisiana from Twin Pipeline, Inc. (Conroe, Texas). The current throughput on the system is approximately 17,000 Mcfd. The acquisition includes approximately 34-miles of 6”, 8” and 10” pipeline and related facilities located in Jefferson Davis and Vermilion Parishes, Louisiana serving both major and independent producers with pipeline delivery options to Texas Gas Transmission, ANR Pipeline and Columbia Gulf Transmission. The effective date of the transaction is February 1, 2005.

“As MIDSTREAM ENERGY’s entry into this prolific onshore region of the Gulf Coast, we are very excited about the opportunity to extend our full range of premier midstream services to the producing community of Southwestern Louisiana” said Roger Brown, Vice President of Business Development and Gas Supply for MIDSTREAM ENERGY.

MIDSTREAM ENERGY is a privately owned full service energy company engaged in the gathering, processing, treating and marketing of natural gas and natural gas liquids.
